ATVET Albany Troy Volunteer Examiner Team

Exam Date	Day	Doors Open	Exam Time (Doors will Close)
February 10, 2018	Saturday	9:20 AM	10:00 AM
March 10, 2018	Saturday	9:20 AM	10:00 AM
April 14, 2018	Saturday	9:20 AM	10:00 AM
May 12, 2018	Saturday	9:20 AM	10:00 AM
July 11, 2018	Wednesday	6:20 PM	7:00 PM
August 11, 2018	Saturday	9:20 AM	10:00 AM

ATVET will again be holding their exam sessions in the C.I.I. Building (Low Center for Industrial Innovations), Room 3045, on the Campus of RPI. Examination room doors will open 40 minutes prior to the exam time, with exams starting at the times indicated above. **NOBODY** will be admitted into the exam room after the starting time. ATVET never requires any pre-registration for any of their exams. Starting January 1, the fee charged all applicants at ARRL VEC-coordinated Amateur Radio examination sessions will be \$15.00 either cash, or check (payable to [ARRL-VEC](#)). This fee is required from all candidates taking any of the exam elements offered by this team.

If you can HELP OUT: call Gerry, WA2IWW

Contact ATVET LIAISON: Gerry, WA2IWW atvet@n2ty.org or 518-482-8700

School Club Roundup

<http://www.arrl.org/school-club-roundup>

Winter/Spring Term: February 12-16, 2018 Fall Term: October 15-19, 2018

Objective: To exchange QSO information with club stations that are part of an elementary, middle, high school or college. Non-school clubs and individuals are encouraged to participate.

CONTESTS

Feb. 2018

L Inter. DX Contest, CW	0000Z, Feb 17 to 2400Z, Feb 18

QRP ARCI Spring Thaw SSB Sprint	2200Z-2300Z, Mar 10
North American Sprint, RTTY	0000Z-0400Z, Mar 11

[D-Star ONE Phoenix, First D-Star Communication Spacecraft, Launched](#) ARRL.org 02/04/2018

A Soyuz rocket launched D-Star ONE Phoenix and 10 other satellites into orbit on February 1 from Vostochny Cosmodrome in Russia. Developed by German Orbital Systems in Berlin in cooperation with the Czech company iSky Technology, D-Star ONE Phoenix carries an [Amateur Radio relay](#).

AARA B-PLUS FEB. 2018

payload (call sign DP1GOS). It replaces the D-Star ONE nanosatellite that failed to attain orbit following a November *Soyuz* launch from Vostochny.

Downlink frequencies are 435.700 MHz for telemetry and 435.525 MHz for D-Star. The uplink is 437.325 MHz.

D-Star ONE Phoenix is a 3U CubeSat equipped with four identical radio modules with D-Star capability, operating in half-duplex mode with a power output of 800 mW. The two telemetry and telecommand modules both receive, and both in sequence, so each telemetry frame is repeated. The other two modules are dedicated to Amateur Radio, although only one will operate at a time.

The modules are configured to work as D-Star repeaters, so they retransmit received D-Star frames on the downlink frequency. They also have a D-Star voice beacon.— *Thanks to AMSAT News Service, D-Star ONE*

Getting Started with LoTW Logbook of the World

Before you can submit QSOs to Logbook of the World (LoTW), you must install the free TQSL application on your computer. TQSL will enable you to obtain a Callsign Certificate that identifies you as the source of the QSOs you submit, and will also enable you to define a Station Location that specifies the geographical details of your operating location. A flowchart illustrating these steps is available [here](#).

The QSOs you've submitted will be confirmed when your QSO partners submit matching QSOs. Before you can submit these confirmations for DXCC, VUCC, WAS, WAZ or WPX award credit, you must [setup the linkage](#) between LoTW and the award families you're pursuing.

Getting Started with Submitting QSOs

Note: If your primary callsign was issued in the United States but the postal address registered with the Federal Communications Commission (FCC) is not current, update it via the [FCC ULS](#) website before proceeding.

Start by downloading and installing TQSL, and using it to request a Callsign Certificate for your current callsign.

1. [Download and Install TQSL](#)
2. [Request Your Initial Callsign Certificate and LoTW Account Password](#)

If your primary callsign was issued in the United States, the ARRL will send a postcard to the postal address specified in your FCC license. The postcard will specify an 8-digit "postcard password"; using your web browser, navigate [here](#), and type in your "postcard password". In response, the ARRL will send you an email message containing your [LoTW Account Password](#), with your [Callsign Certificate](#) attached.

3. [Accept Your Initial Callsign Certificate](#)

Next, define a Station Location that describes the location from which you operate using your current callsign. If you have operated from more than one location, start by defining a Station Location for your current location; you can [define additional Station Locations](#) later.

4. [Define Your Initial Station Location](#)

Before using TQSL or your logging application to submit QSOs to LoTW, employ the username and password contained in the email you received from the ARRL to verify that you can [log in to your LoTW Account](#). Be sure to remember this username and password, as your LoTW Account enables you to confirm that the QSOs you submit to LoTW [have been accepted](#), determine which of your submitted QSOs [have been confirmed](#) via LoTW, and [submit confirmations for Award Credit](#).

5. [Log in to your LoTW Account](#)

Now you can [submit QSOs to LoTW!](#)

Are You Changing Your Address: Please contact Walt, WA1KKM 518 456-3637 or via e-mail sue.walt@dososaur.com with your address corrections
